The Union Learning Fund

The Union Learning Fund (ULF) was established in 1998 to promote activity by trade unions in support of the objective of creating a learning society. Its initial aim was to develop the capacity of trade unions and Union Learning Representatives (ULRs) to work with employers, employees and learning providers to encourage greater take up of learning in the workplace. The rationale for union involvement in skills is in addressing market failures by utilising the unique role of unions at the workplace. This enables them to engage with workers and employers to advocate for learning and build structures at the workplace (ULRs, learning agreements, learning centres) and partnerships with providers that helps turn engagement into participation. Independent evaluations have consistently demonstrated the value of the ULF to employers, individuals and the economy.

The scope of the ULF has gradually developed over the last 19 years as union capacity has grown, and government strategic objectives have changed and unions have been encouraged to prioritise work on:

- tackling disadvantage
- promoting equality and increasing social mobility,
- improving basic skills, (English, maths and Digital),
- helping people access work and adapt to change at work and the lengthening of working life,
- supporting high quality apprenticeships and supporting unions to maximise the impact of the apprenticeship levy.
- developing innovative solutions to skills issues
- contributing to developing the skills required by key infrastructure developments (such as HS2, Hinkley Point and Heathrow), new government initiatives (such as the National Retraining Scheme) and regional and sector skills plans.

This Round of the ULF will enable unions to apply for projects designed to run for more than one year that continue the work they have been undertaking; and also to develop shorter projects (one year) that tackle problems and issues in the labour market and/or trial new or innovative approaches to skills development and/or labour market failures.

*people who complete at least three episodes of union learning are 5.7 more likely to gain promotion*
The ULF is managed and administered by unionlearn, the TUC’s Learning and Skills Organisation, under an agreement with the Department for Education (DfE). This directs the level and type of learning activity that the Fund can support.

Unions are invited to put in bids that will then go through a selection process based on what unionlearn and DfE have agreed are the priorities and the types of activity that will achieve the outcomes and outputs that should be funded through public funding. There is no commitment on longer term funding from DfE at this point in time and issuing the Prospectus does not guarantee that funding will be available after 2020.

**Unionlearn’s main functions are to support unions to:**

- Develop as effective learning organisations and broker learning opportunities for their members.
- Understand, engage with and influence learning and skills policy.
- Engage effectively with employers to develop learning and skills strategies that address both organisational and individual skills needs.
- Engage effectively with employers and other stakeholders to support the learning and skills developments required to tackle poverty and disadvantage and promote employment and the growth of the economy.
- Evaluate and provide an evidence base for the unique contribution that unions make to improving learning and skills.

**People who complete at least three episodes of union learning are**

3.4\(^x\) more likely to report that they could do their job more effectively

**Unionlearn will effectively manage and administer the Union Learning Fund to:**

- Build union capacity to sustain work on learning and skills and embed it in union strategy and structure.
- Support unions in raising demand for learning, especially among workers with low skill levels and with disadvantaged groups in the workplace.
- Maximise the union contribution to the development and delivery of the Government’s strategy to improve the skills of the workforce and the performance of the economy and to increase engagement in learning. In particular to:
  - Improve English, maths and digital skills.
  - Grow the number of high quality apprenticeships and ensure effective use of the apprenticeship levy.
- Support unions to provide high quality support to learners (information, advice and guidance), to promote and support learner progression and to track their learners.
- Support unions to develop new and innovative solutions to skills issues, improve access to learning and offer a growing range of learning opportunities to a wide range of learners and assist them to engage with new forms of learning (e.g. on-line/distance learning and mobile as well as static learning facilities).
- Tackle inequality and disadvantage through learning, in particular by improving participation of disadvantaged groups in apprenticeship and improving access in areas where they are poorly represented.
- Work in partnership with employers to develop sustainable arrangements based on formal learning agreements and which tackle both organisational and individual skills needs.
- Establish effective partnerships with learning providers which ensure learning opportunities are customised, quality assured, relevant and delivered effectively with appropriate support given to learners and that learner data is collected and shared with the union.
- Develop union capacity to engage in effective partnership working with key infrastructure projects at regional and national level and with devolved administrations to help meet the skills needs of both the current and future workforce.
- Support unions in developing projects and approaches that help deliver the skills needs of both the current and future workforce and in managing their projects effectively and efficiently.
- Support unions in collecting learner information, tracking learners and in developing their capacity to demonstrate the impact of union learning.
- Guide unions on the requirements of public funding and the evidence and reporting requirements that they will need to meet.
Key themes and priorities for ULF projects in 2019-20

The government’s policy approach on learning and skills is prioritising a number of key areas including:

- Helping more young people to have the opportunity to access high quality vocational pathways into sustainable employment, especially through apprenticeships.
- Enabling many more adults, especially the most disadvantaged, to attain the minimum standards in English, maths and digital skills that are required in the modern labour market.
- Supporting progression by young people and adults to higher level skills, including through further reform of technical and professional education;
- Planning for a stronger local dimension to FE and skills funding and provision as part of its strategy to devolve more powers to cities and local authorities and;
- Developing a new National Retraining Scheme that will initially be piloted and subsequently launched as a full programme by the end of the current Parliament.

Supporting social mobility is a key feature of the government’s policy approach on education and skills with a specific focus on widening opportunity for disadvantaged young people and adults. Since its inception the ULF has prioritised the aim of boosting social mobility by reaching out to young people and adults who have been failed by the formal education system.

Other ULF priorities include supporting more disadvantaged young people to access high quality traineeships and apprenticeships and empowering more adult employees with few formal qualifications to embark on a learning pathway that boosts their job prospects and personal development.

Apprenticeships are at the heart of government skills policy with an ambitious target of 3 million starts between 2015 and 2020. There are also specific targets for public sector organisations that will have a major impact on recruitment and development of apprenticeships across our public services. Supporting young people who are not ready to start an apprenticeship, including through participation in high quality traineeships, will also continue to be a key policy priority.

A significant policy measure is the apprenticeship levy which is now paid through PAYE by all those employers with an annual pay bill in excess of £3 million. All these employers can recoup their levy payments (and an additional 10% top-up) if they recruit enough apprenticeships. This policy measure will transform the skills world as it will require employers to invest up to £3 billion per annum for apprenticeship provision whilst also empowering them to have a much greater say in setting standards and funding levels. A new body – the Institute for Apprenticeships - is playing a major role in giving employers a stronger voice in influencing the design and delivery of apprenticeships.

The combined impact of the levy and other measures (e.g. the public sector targets) is a significant challenge to unions and employers in larger organisations and unions will be key to engaging constructively with employers new to apprenticeship recruitment and also with
those looking to increase apprenticeship recruitment significantly. Some large unions will also be paying the levy in their own right as employers and there is an opportunity for levy-paying unions to devise strategic collaborative approaches to maximise their “spending power” with training providers in this new funding environment.

Traineeships are an education and training programme that was introduced in 2013 to support those aged 16-24 to progress into apprenticeship or employment. Consisting of work experience, work preparation training and English and maths training a traineeship is designed for those who will be ready to enter the labour market within 6 months. There is a continued focus on growing the traineeship programme to support more young people into the labour market via high quality programmes which support a range of wider government priorities.

There also continues to be a strong policy focus on tackling the UK’s poor performance in equipping all citizens, both young people and adults, with the level of English and maths skills necessary to support sustainable employment and career progression. Whilst there remains a preference for all young people to pursue a GCSE grade in English and maths where at all possible, the government also remains committed to the important role of Functional Skills qualifications in the workplace as a level 2 alternative to GCSEs. In addition, the government has announced that it will be introducing a new entitlement to “make training in basic digital skills free for adults lacking relevant qualifications”. In principle this should put digital skills on a similar footing to the English and Maths level 2 entitlements in the future.

Supporting people to progress to higher level skills is another recurring theme of government policy and ongoing reforms to vocational qualifications for young people and adults are being taken forward with this aim in mind. As set out in its Post-16 Skills Plan, the government is taking forward the recommendations of the Sainsbury Panel to develop a comprehensive new technical education system and has committed to increase funding for this by £0.5bn per annum when the new T level qualifications are fully available in 2022. The government is also extending vocational specialisation in colleges and establishing new institutions (e.g. the new national colleges covering priority areas such as high-speed rail and the nuclear industry). The overall aim is to increase very significantly the number of opportunities for more young people and adults to access higher level vocational education.
In the Autumn 2017 Budget the Chancellor announced that the government would be establishing a National Retraining Scheme and that it would enter into a formal skills partnership with the TUC and the CBI to develop this new skills programme.

The TUC believes that unions, government and business must work together to make sure that the National Retraining Scheme helps workers who are at risk from the impacts of automation, digitalisation and other aspects of industrial change. Globalisation, industrial change and Brexit demand that we invest in the potential of all workers, delivering the skills we need to compete in the growth sectors of the future.

Trade unions will have a unique role to play, making sure workers receive the right support and training opportunities through the new programme. The government is currently running a number of pilots to test out aspects of the new programme and there will be an intensification of piloting from autumn 2018 onwards.

To support the strategy for raising skill levels we have agreed the following key themes and priorities for ULF projects to focus on:

- Improving Equality and Tackling Disadvantage.
- Improving English, maths and digital Skills.
- Growing High Quality apprenticeships and traineeships.
- Improving Support for Infrastructure Projects, Workforce Development and Skills Progression.
- Demonstrating Sustainability, Value for Money and Impact.

Applications are invited for projects that are:

- **For a period of up to 3 years.** All such applications will need to address priorities 1 and 5 and at least one of the three other priority areas. The project will need to show what it will do in each of the delivery years and will be subject to the Payment by Results framework agreed with DfE. The pot for these applications will be the greater part of the ULF Allocation. Unions should note that there is no guarantee that funding will be available in financial year 20-21 onwards as this is subject to the outcome of the Government Spending Review.

- **For a period of one year.** These projects should be designed to be innovative, trialling a new approach or addressing a specific priority, problem or skills need that has been identified. The project will have a delivery plan and will have to demonstrate how it will contribute to at least one of the priorities identified above, have clear project outcomes and deliver value for money. It will be monitored by unionlearn and subject to the under-performance procedure.

Unions may apply for more than one project and applicants will devise their projects to meet the priorities described above. In the sections below we provide some guidance on the type of work that might be undertaken.
1. Improving equality and tackling disadvantage

Evidence required:

- What is the evidence of need for the area of disadvantage, lack of diversity or inequality? (Statistics, surveys or union information)
- What is the strategy to address this need?
- Why is the union well placed to deliver this project?

Examples of activity:

- Engaging those from disadvantaged backgrounds in the labour market (for example developing formal and informal routes to learning, employment and progression for a target group)
- Tackling areas of inequality within workplaces, sectors or employment areas (for example where women, migrant or BME groups are under-represented or where people with a disability or mental health problem are not supported)
- Tackling areas of inequality where people are disadvantaged by their lack of access to qualifications, training, skills and support and face change/redundancy or seek development to adapt to the future.
- Supporting those in insecure or temporary employment to develop skills and progression plans that improve their employment opportunities.
- Supporting access to flexible on-line learning (for example opening union and workplace Learning opportunities and facilities to the wider community and to help tackle the Digital Divide and its impact on the most disadvantaged groups in workplaces and local communities.
- Utilising learner data to prioritise and target hard to reach cohorts of learners, to track the progress of disadvantaged learners and measure the impact of the learning undertaken.

2017 UNIONLEARN SURVEY

92 per cent of ULRs and other reps have raised awareness of learning among colleagues.

92%

unionlearn from the TUC
2. **Improving English, maths and digital skills**

Evidence Required:

- What is the evidence of need? (Statistics, skills assessments, union information)
- How does the project support individuals to identify their skills gaps?
- Why is the union well placed to deliver this project?

Examples of activity:

- Supporting union members, workforces and individual employees to identify skills gaps and learning needs and assess the level of maths, English and digital skills through initial assessment and diagnosis.
- Supporting learners to access programmes which improve their English, maths and digital Skills.
- Working with employers and learning providers to build on existing curriculum, develop tailored approaches to the delivery and development of English, maths and digital skills for the many different contexts and levels within which these skills are used at work.
- Developing the ULR role in supporting learners and individuals with English, maths and digital needs in the workplace to develop and progress.
- Tracking the progression of learners to measure the impact of participation in English, maths and digital learning; collating and disseminating evidence of personal and organisational benefit from the acquisition of these core skills.

3. **Growing high quality apprenticeships and traineeships**

Evidence Required:

- What is the need/demand for apprenticeships/traineeships the project will address?
- How will the project engage with employers and learning providers to increase apprenticeship/traineeship opportunities that meet the needs of the organisation/sector?
- What will the project do to improve pathways towards and access into apprenticeship?
- How will it support apprentices/trainees and how will it ensure quality provision?

Examples of activity:

- Working with employers and unions to increase the number of high quality Apprenticeship places available.
- Focussing on employers with potential to expand their apprenticeships and those employers not yet involved in apprenticeships and on promoting apprenticeships to disadvantaged and under-represented groups.
- Engaging directly with levy-paying employers and unions to support them in using the levy effectively. Working with employers and unions in the scope of the public sector target to increase the number of high quality apprenticeships and use their levy effectively.
- Working with employers and providers to develop work entry and experience programmes and to increase the number of high quality work experience and traineeship places available; in particular ensuring that trainees are supported and that the experience provides them with skills and routes to apprenticeship, employment or further learning.
- Working with employers and providers to develop new and tailored traineeships and apprenticeships that meet the needs of the business and develop the skills base of the workforce.
- Supporting trainees/apprentices in the workplace through mentoring, buddying, advice and other forms of engagement and representation.
- Developing partnership approaches to increase the opportunities for young people to prepare to enter work and to support the needs of young workers entering the labour market and make them aware of the benefits of traineeship and apprenticeship.

4. Improving support for Infrastructure Projects, Workforce Development and Skills Progression

Evidence Required:

- What is the skills issue or infrastructure project that the project seeks to address? (Statistics, surveys, union information)
- How will the project engage with employees and employers?
- How will co-investment and lifelong learning be promoted?

Examples of activity:

- Working with employers to promote learning and career progression, co-investment in skills, the use of professional and occupational standards, more effective skills
utilisation, improved leadership and management and greater employee involvement and commitment in the workplace.

- Engaging with employers and providers to increase access to learning opportunities, to promote the uptake of learning and to ensure high quality learning provision. This would be underpinned with agreements and structures to help define and monitor arrangements.
- Working with Local Enterprise Partnerships, Combined Authorities, employers and employer representative bodies to identify skills requirements, tackle skills deficits and meet future skills needs.
- Maximising the use of current workforce skills, improving attendance and workforce wellbeing and adopting new techniques and technologies or suitable training that improves the productivity of the workforce.
- Developing the role of union representatives and ULRs in supporting learners and helping individuals in the workplace to develop and progress, access good careers advice and guidance including through the National Careers Service and Advanced Learner Loans and raising awareness of potential training opportunities.
- Providing advice and support to enable and encourage progression through workforce development opportunities including Continuing Professional Development (CPD) via the union route and the ability to re-skill or up-skill through improved access to Further and Higher Education (HE).
- Developing strategies and tailored approaches to support workers faced with redundancy or those likely to need support and retraining as change requires them to acquire new skills or career including careers advice or guidance on appropriate training opportunities.

5. **Demonstrating Sustainability, Value for Money and Impact**

Evidence Required:

- How will the project improve union capacity to support leaners?
- How will the project activity be sustained when funding ends?
- How will funding from other sources (union/employer/individuals) be levered into the project?

Examples of activity:

- Mainstreaming learning and skills within the union’s core activities.
- Devoting core union staffing to the promotion of learning to support the role of ULRs and union work on learning and skills.
- Consolidating the work and approaches developed in previous ULF projects, for example:
  - Methods and materials developed by one region of the union being rolled out to the rest of the union.
  - Sharing and disseminating experience with other unions and unionlearn.
  - Adapting and embedding the approach and methods piloted by other unions.
- Developing sector or employer approaches involving one or more unions and building on earlier ULF work.

- Tracking learners and using this data to demonstrate the impact of the work undertaken, for example:
  - Demonstrating the progression achieved by individuals and groups of learners.
  - Surveying learners to identify the impact of learning on them.
  - Surveying employers to identify the impact of learning on the workplace.

- Demonstrating that projects represent value for money and illustrating this by for example:
  - Showing the added value of funding the project. Are funds levered in? Is the employer contributing towards the costs? What is the union contributing towards the costs?
  - Identifying with whom the project will be targeted at and what the impact of the project will be on them/their employer/the community? Is this project adding value to existing support for these learners?
  - Showing that the management and governance of the project is cost effective and ensures delivery

All bidders should note that the DfE is attaching particular importance to measuring the quality and impact of project outcomes, as well as the value for money each project represents.

---

**BENEFIT TO THE EXCHEQUER:**

£3.57 for each £1 spent on ULF
Bidding to the Union Learning Fund

1. **Eligibility**
   - Any trade union based in England, or any national organisation representing trade unions based in England, whether or not it is affiliated to the TUC.
   - Any trade union led partnership including those that have not yet applied to the ULF.

2. **Project Aims and Content**
   - Projects may apply either for multi-year funding (3 years) or for one-year funding to develop new or innovative approaches to skills issues. All projects should address themselves to the priorities and themes described above.
   - **ALL multi-year bids must address Priorities 1 and 5 and at least one of priorities 2 to 4.**
     - Projects will need to supply a costings plan for the proposal for each year. This should give details of the full budget of the project (including the requested grant funding as well as any other sources of funding), and how much money will be spent on each phase and specific activity. Bidders should explain how they will ensure that they spend money in a way that is economical, effective and efficient.
     - Projects will also need to provide a description of the outcomes they expect to generate over the course of the project.
   - **Projects that are one-year bids tackling new areas of work or piloting new approaches must address at least one of priorities 1 to 4 and deliver value for money.**
     - Bids will also need to demonstrate that they have a plan for monitoring and evaluating their success. They will produce a costing plan and explain how they will ensure that money is spent in a way that is economical, effective and efficient.
     - Examples of the sort of activity that might be appropriate for this funding are:
       - Establishing work in new areas of employment, geography or with employees and employers that have not engaged previously in learning and skills and identifying the potential benefits.
       - Developing new work or new approaches with hard to reach workers and those in insecure employment or undergoing restructuring or significant skills changes in their area of employment.
       - Trying out new learning approaches, technologies or learning offers.
       - Tackling specific skills issues or problem areas where unions have found it difficult to engage employees and employers in skills development.

3. **Responsibilities and Requirements**
   - You should be sure that you fully understand your financial and reporting responsibilities in receiving ULF funding and are prepared to accept them prior to
signing the contract. Each project’s progress will be regularly monitored and audited and will require you to:
  o Keep detailed financial records and report monthly.
  o Record who your project engages and who your learners are and track their progress.
  o Collect quantitative and qualitative impact evidence and quality assure the work of the project.
  
- Successful projects are monitored on a monthly basis and projects that are not achieving their projected outcomes are reviewed and subject to performance review. All multi-year projects will be subject to the Underperformance Scheme agreed between unionlearn and the DfE.
  
- The underperformance review process is geared to helping projects restructure and establish a supported action plan to achieve the targets that have been agreed but bidders need to be aware that in the event of serious under-performance projects may be terminated or have funding reduced.
  
- For multi-year projects the Payment by Results Framework means that:
  o Any project that is achieving less than 20% of its profiled outputs at the end of Quarter 2 will be terminated or significantly reduced unless there are extenuating circumstances. In such cases a business case demonstrating project viability will be required which will be agreed with the DfE Account Manager.
  o Any project achieving less than 40% of profiled outcomes at Quarter 2 will be put under review for the proceeding months and managed in line with the ULF underperformance policy with a view to reducing its funding to no more than 70% of its bid funding.
  o If a project has achieved less than half (50%) of its outputs by the end of Quarter 3 its funding will be frozen (up to a maximum of 70% of project budget) for Quarter 4 until it achieved over 50% of its outputs.
  
- Innovative one Year Projects will not be subject to Payment by Results but will be monitored by unionlearn and DfE using the Underperformance Procedure to take account of the increased risk associated with projects that are trying new and unproven approaches.
  
- One-year projects not trialling new or innovative approaches (i.e. projects repeating past programmes or using well established techniques) will still be subject to the Payment by Results Framework.

For further details of the requirements for tracking and the payment by outcomes process please contact the national office.

4. Support
  
- Each project will be allocated a unionlearn support worker and will have support from unionlearn at both national and regional levels.
• Project managers will be supplied with detailed information on reporting requirements and an event is held at the start of all new contract years to provide further details. All project managers will be required to attend this and other specified ULF project seminars. Unionlearn also provides support seminars and training for project staff and while attendance at most of this training is voluntary, unionlearn may require staff to undertake specific training for compliance reasons (e.g. GDPR or Equality and Diversity Training).

5. Project duration
• Projects are invited to apply either for one year or up to 3 years funding. The current funding commitment from DfE is for the financial year 2019-2020 (commencing 1st April 2019 up to 31st March 2020), and any funding for future years will be subject to approval by Parliament. Projects designed to deliver over a longer period will be continued after this date subject to performance and to funding being available.

6. Project size
• There is no maximum amount for bids, but unions must scope activity and objectives rigorously before identifying funding requirements.
• The amount requested in the bid should reflect a realistic level of activity and outcomes, and represent value for money.

7. Salaries
• The ULF will support the payment of salaries to project staff responsible for running the project.
• There will be no ongoing commitment to funding salaries.
• Funding will not be given to cover the salary costs of existing union posts.
• Funding will not be given to cover employer costs of releasing union members to attend training/learning activities or to train as ULRs.

8. Employer-funded training
• It is not intended that ULF should be used to replace employer-funded training, for instance by funding purely job-specific courses for employees, which should be the responsibility of employers.

9. European Social Fund
• ULF monies can be used to match fund a European Social Fund (ESF) project in certain circumstances. Any proposals to do this must be cleared with the unionlearn delivery team.
10. Double funding

- Double funding is not permissible and applications will be checked to ensure that they avoid any possible double funding. Where project activity is funded by other public funding sources unions will need to demonstrate additionality between activities funded under each funding stream in order to ensure value for money.

11. The application process

How to submit an application.

- A final application form which must be submitted by **12pm on Friday 5th October 2018.** Application forms should be submitted through the ULF database. If you do not have access to the database, please contact Marj Wainwright on mwainright@tuc.org.uk or 0151 482 2718.
- There is a requirement to send a letter signed by the union’s authorising officer to confirm that the bid has the support of the union nationally by **12pm on Friday 5th October 2018.**
- Unionlearn will review and comment on draft applications submitted between the launch of the prospectus and up until **5pm on Friday September 28th 2018.**

Please send to:

FAO Julia Jones  
Union Learning Fund Team  
Unite Office Liverpool  
Jack Jones House  
1 Islington  
Liverpool, L3 8EG

The ULF team will assist projects with the process. For further information telephone the national office 0151 482 2711

12. What are the key deadlines?

- Draft application form before **5pm on Friday September 28th 2018** if comment/support is required.
- ULF Application Form and supporting letter by **12pm on Friday 5th October 2018.**

Submissions received after these date will not be considered.

13. What happens next?

- You will receive feedback on any draft application within one week of submission and for those submitted at the final deadline of September 25th by October 3rd. The
feedback will set out any issues or points that need to be addressed for the project to move to final bid.

- Bid support will be available from the Prospectus launch with support from the unionlearn delivery team for submission in October.
- The ULF Assessment Panel will meet the end of October 2018 and make a recommendation to DfE.
- Contracts will be issued as soon as possible after final negotiations are completed, for projects to commence 1st April 2019.

14. Who decides whether my bid is successful or not?

The ULF Assessment Panel, which is independently chaired and made up of representatives from unionlearn, DfE, and affiliated trade unions will make final recommendations on all applications to the Unionlearn Board and DfE unionlearn Sponsorship Team. Both the unionlearn Board and DfE have a final decision on the projects.

15. How will Projects be assessed?

The panel will use a scoring system to evaluate bids and discuss which should be approved and make recommendations on any amendments or developments that would be required before projects can be approved.

The scoring system is designed to ensure projects meet the strategic and operational requirements that have been agreed between DfE and unionlearn. Further information can be obtained from the bidding guidance. Unionlearn will also hold workshops and offer support to those wishing to make bids or find out more about the application and scoring process.
